

THE PENNSYLVANIA AGENDA FOR WOMEN'S HEALTH

For far too long, the agenda of the Pennsylvania legislature has been to restrict and reduce women's access to reproductive care under the guise of promoting "women's health." It is time we focus on policies that truly promote healthy women and families and put an end to the health inequities women face. Pennsylvania families are stronger and more stable when women are healthy and adequately protected by Pennsylvania laws.

The women's agenda is a package of state bills that provide commonsense solutions to problems women and their families are facing. With your continued support these bills will one day become laws in Pennsylvania.

- Fighting deep poverty among women with children through studies and reform
- Pay Equity legislation
- Protecting all employees against sexual harassment regardless of employer size
- Ensuring widows of state and municipal employees get fair pensions
- Identifying gaps in health care for women veterans by establishing a task force to study health issues
- Rental protection for victims of domestic violence
- Cell phone contract termination for domestic violence victims
- Curbing political interference in providers' medical decisions by protecting the doctor-patient relationship
- Raising the minimum wage to \$10.10 per hour
- Workplace accommodations for pregnant women
- Safe access to health care facilities
- Protect women from sexual assault on college campuses through amended university policies

Victory! These 2 bills were passed into laws: Equitable protection for domestic violence victims and Stopping "Revenge Porn"
